## **N.1 - aprile 2016**

**Step by step development of HIRM-KW: a field-scale runoff model.**

*Domenico Ditto, Mattia Sanna, Ludovico Alfieri, Mattia Fumagalli, Marco Acutis*

**[Impact of photosynthetic active radiation on performance of tea crop under agro forestry eco system in eastern India.](#)**

*Asis Mukherjee, S. Sarkar*

[Using HYDRUS-2D model to assess the optimal drip lateral depth for Eggplant crop in a sandy loam soil of central Tunisia.](#)

*Hiba Ghazouani, Dario Autovino, Giovanni Rallo, Boutheina Douh, Giuseppe Provenzano*

[Salicylic acid improves growth and essential oil accumulation in two \*Nepeta cataria\* chemotypes under water stress conditions.](#)

*Hussein A.H. Said-Al Ahl, Ali S. Sabra, Mona H. Hegazy*

[Evaluation of growth conditions and maize yield forecast in Russian regions from satellite data in a simulation model.](#)

*Kleshchenko A.D., Naidina T.A., Goncharova T.A., Lebedeva V.M.*

[The effectiveness of agrometeorological information in the realization of Kenya's Vision 2030; lessons learnt from China.](#)

*Victor Ongoma, Zablun W. Shilenje*

## **N.2 - agosto 2016**

[Agro-phenological observation and modeling of cereals in Padana Plain in the period 2003-2012.](#)

*Gabriele Cola, Linda Pieri, Fiorenzo Salvatorelli, Francesca Ventura*

[Sweet sorghum in a bioethanol supply chain: effects of different soil and nitrogen management on energy performances and greenhouse gas emissions.](#)

*Pasquale Garofalo, Laura D'Andrea, Alessandro Vittorio Vonella, Michele Rinaldi, Angelo*

*Domenico Palumbo*

**[Design and implementation of maize \( \*Zea mays\* L.\) growth simulation model for Northwest region in China.](#)**

*Rajawatta KMW, Dongjian He, Piyaratne MKDK, Haidong Lu*

**[Reduction of Global Warming Potential from rice under alternate wetting and drying practice in a sandy soil of northern Italy.](#)**

*Gianluigi Mazza, Alessandro Elio Agnelli, Gabriele Orasen, Massimo Gennaro, Giampiero Valè, Alessandra Lagomarsino*

**[Effect of water supply method, variety selection and their interaction on growth and yield of kenaf in the tropical wet-and-dry climate of Nigeria.](#)**

*Ayoola K.O., Eruola A.O., Adejuwon J.O., Makinde A.A.*

## **N.3 - Dicembre 2016**

**[Growth of the perennial energy crop giant reed \( \*Arundo donax\* L.\) simulated with ARMIDA, a modified version of the LINTUL model.](#)**

*Antonio Volta, Giulia Villani, Vittorio Marletto, Enrico Ceotto*

**[A methodology for the assessment of the potential of precision weed management based on geostatistical and crop growth model simulations.](#)**

*Fabio Castaldi, Raffaele Casa*

**[Analysis of a precipitation time series at monthly scale recorded in Molfetta \(South Italy\) in the XVIII century \(1784-1803\) and comparisons with present pluviometric regime.](#)**

*Gianfranco Rana, Cristina Muschitiello, Rossana M. Ferrara*

**[Tools for stochastic weather series generation in R environment.](#)**

*Emanuele Cordano, Emanuele Eccel*

**[Effects of drought and salinity on maize phenology, morphology and productivity in a semi-arid environment.](#)**

*Romdhane Leila, Dal Cortivo Cristian, Vamerali Teofilo, Radhouane Leila*
